School Concert Draws Big Audience

Students of Carbon school performed to a near-capacity audience in the Scout hall on Tuesday evening when a program of vocal selections, elocution numbers and a play were presented as a preview to their appearance in a musical festival at Trochu Friday. The following program was enjoyed:

Choir, Grades III and IV — "The Farm"
Elocution, "Traffic Rhyme," Geraldine Mortimer and Gail Schmierer.

Solo, "John Peel," by Nova Buyer.

"Spring Song," by Shirley Schuler, Jackie Homeniuk and Norma Hay.

"Columbia," by Wayne and Archie Ohlhauser.

Elocution, "Joy in the Morning," by Gene Reifsnnyder.

"My Little Maid," by Carol Rott, Marilyn Martin and Shirley Schacher.

Boys' Choir, Grades VII and VIII, "Huckleberry Finn."

Solo, "Privateer," Gene Reifsnnyder.

Piano Duet, "Serenade for Strings," by Audrey and Marilyn Martin.

Duet, "The Ash Grove," by JoAnn Ohlhauser and Doreen Harsch.

Solo, "Privateer," by Wayne Garrett.

Play, "A Portrait of a Gentleman in Slippers," with Dennis Barr, Myrna Schell, Morley Buyer and Roger Tetz. Story by A. A. Milne was directed by Mrs. Jack Barr.

Solo, "Teddy Bear's Picnic," by Jerry Leiske.

Solo, "The Leaf and the Bud" by Enith Diede.

Choir, Grades VII and VIII girls, "White Birds" and "Towards the Shores of Pallestuna"

Following the program Mr. Jack Appleyard presented bouquets to Mrs. Emil Ohlhauser, Mrs. Jack Barr and Mrs. Adam Buyer for their time and efforts spent in rehearsing the pupils in the various numbers.

Legion Auction Sale Planned for May 5

Posters are now out announcing the community auction sale being sponsored by the Carbon branch of the Canadian Legion. Scheduled for Saturday, May 5, the sale will see the auctioning of a big variety of new and used farm implements, many of the latter recently reconditioned or in good working order. Household articles and many miscellaneous items are also listed.

Articles are still being accepted for auction by the Legion. If you have anything to sell list it as soon as possible at Fred's Barber Shop or the Chronicle office, or with any Legion member. Items which you may wish to donate to the Legion sale will be gratefully accepted and picked up prior to the day of auction. All other items must be brought to the sale by the owners. The auction will be held north of Art's Auto Body Shop in Carbon. Noah Boese of Swallow is the auctioneer and Stan Torrance is clerk.

Tea Growing In B.C. May Boost Industry

VICTORIA, B.C. — Tea growing may develop into an industry in British Columbia employing many hundreds of persons, Trade and Industry Minister Leslie Eyres said in the legislature.

The minister disclosed that a firm at Milner, in the Fraser valley, is growing tea and has blended the finest black and green varieties.

The firm now has 300 bushes and will double that number this year and hoping to produce 2,000 pounds of tea in the current season.

Mr. Eyres advised it took three years for a tea bush to reach maturity.

Funny and Otherwise

Dumb Secretary: I can't type this letter to Mr. O'Toole.
Boss: Why not?

Dumb Secretary: How can I type "O'Toole" when there's only one "o" on the typewriter?

Carson: The last time I went to one of those drive-in movies I had an awful experience. It started to rain . . .

Hutton: What was the name of the picture?

Carson: I don't know, but it was the first time I ever saw Betty Grable playing opposite two windshield wipers!

Customer: "I want a revolver."
Shopkeeper: "Six chambers, sir?"

Customer: "No. Better make it nine chambers. It's for the cat next door."

The boss insisted on taking a personal interest in the welfare of his employees and encouraging them to try to get on. He approached Stevens and asked him: "And what is your pursuit in life, Stevens?"

"That sir," replied Stevens "depends upon whether I'm coming or going. In the morning it's the 8:20 and in the evening it's the 5:20."

Porter: "Yes, mum, it's always the last carriage that suffers the most in a collision."

Old Lady: "Then don't you think it would be an excellent idea to take it off?"

Spring Styles Note From Coronet: After trying on a few dresses and a dozen hats, a woman begins to wish she'd brought some money along.

Patient: Remember when you took care of my case three years ago? You told me to avoid dampness.

Doctor: Yes, that's right.
Patient: Well, do I still have to avoid dampness?

Doctor: I guess not. You're in perfect health now.

Patient: Glad to hear it. Now I can take a bath again.

"When I got round with that load of coal for Mr. Smith his house was on fire."

"That's unfortunate, I suppose he told you to take it back."

"No. He said if it was anything like the last lot I'd better throw it on."

Wife: What would you do if I suddenly died?

Husband: I'd go mad.

Wife: Oh, I'll bet you'd get married again in a month.

Husband: I wouldn't go that mad.

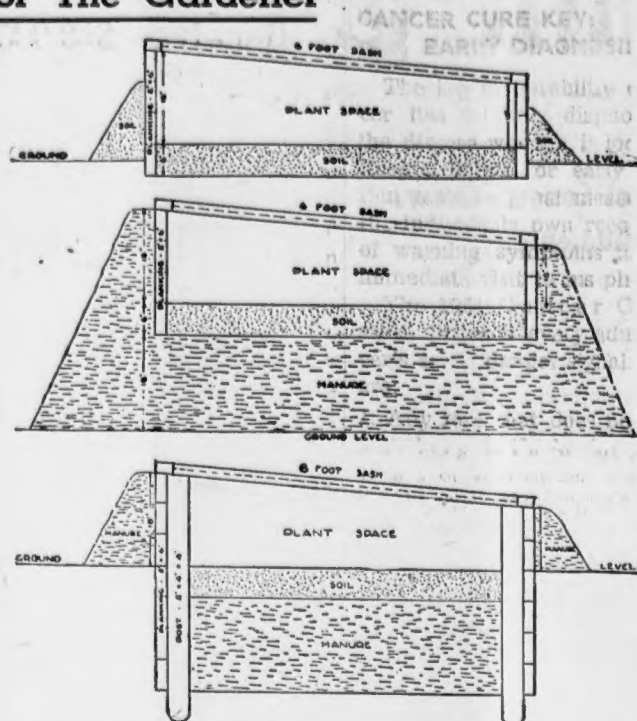

Mrs. Jones: How do you spell "necessary?"

Mrs. Jones: N-e-s-s-e-s-s-a-r-y.

Mrs. Jones: The dictionary spells it n-e-c-e-s-s-a-r-y.

Mrs. Jones: You asked me how I spell it.

For The Gardener

HOTBEDS, COLD FRAMES—Above are diagrams of two types of hotbed and a cold frame, structures of great value to the gardener whether he be in it commercially or merely for his own pleasure. Top diagram shows the construction of a cold frame. In the centre is a hotbed, surface type, and at the bottom is a permanent hotbed with pit. Construction and operation details are available in Publication Number 663, from Information Service, Department of Agriculture, Ottawa.

: Western Briefs :

Pensions Boosted

VICTORIA, B.C. — Service pensions for retired school teachers in B.C. will be increased to \$21 annually for each year of service under provisions of Teachers' Pensions Act amendments introduced in the Legislature by Education Minister W. T. Straith.

Checking Houses

SASKATOON, Sask. — City engineers say a number of poor-built shacks and homes are being moved here from country points. They are willing to see good structures moved in this fashion but are asking owners of poor buildings to make improvements before moving.

Placed Third

WINNIPEG, — Dauphin placed third out of 42 Canadian towns and cities which received merit awards for scoring between 80 and 90 per cent. in a fire prevention campaign held last October. H. E. Puttee, provincial fire commissioner, revealed. The competition is conducted by the National Board of Fire Underwriters and the National Fire Protection association.

Good Record

VICTORIA, B.C. — Harry Kirby, 57, who lost an arm in a train accident in 1920, has been driving a taxicab ever since. Now he's covered more than a million miles—and never had an accident.

To Build New Hospital

ELKHORN, — Construction of the new six to eight bed hospital here will begin immediately it was learned here. Contract for the work has been let to the Weibe Construction company of Winnipeg and calls for completion of the work by November 1. Amount of the contract was not disclosed.

Returns Gesture

WINNIPEG, — The Manitoba Red Cross has offered rubber boots and waders, thermos jugs, blankets, plastic gloves and other supplies to the American Red Cross for use in flooded areas of Minnesota. During the Manitoba floods last year, the American Red Cross donated \$250,000.

Timely Runaway

REGINA, — When a team of horses bolted from the railway tracks in a heavy snowstorm recently at Kronau, they saved the life of farmer Guy McCall, who was in the enclosed sleigh and did not see a freight train that missed him "by inches".

ODDITIES IN THE NEWS

Doctors at Sacred Heart Hospital at Norristown, Pa., disclosed that a woman had given birth to a boy there after a pregnancy of 11 months. The infant weighed eight pounds, three ounces.

Four-year-old Howard Lawson, Jr., of Newark, N.J., watched his father tack up signs and decided to try it himself. Later doctors removed a tack from the head of Howard's three-year-old sister, Celestine.

IN PRAIRIE PROVINCES

About two-thirds of Canada's occupied farm lands are in the prairie provinces.

PEGGY

Appointed Dean Of Agriculture

EDMONTON, — Dr. A. G. McCalla, professor of plant science at the University of Alberta, has been appointed dean of agriculture succeeding Dr. R. D. Sinclair, who died last September.

A native of St. Catharines, Ont., Dr. McCalla graduated from the University of Alberta in 1929 and received his master's degree in agriculture in 1931. He obtained his Ph.D. from the University of California.

Last year, Dr. McCalla was appointed a member of the national research council as Alberta representative succeeding Dr. Robert Newton, former president of the university.

Urges Support For Dairy Farmer

CALGARY, — The gravest problem in Canadian agriculture today was the plight of the dairy farmer. "I think it is more important we do more for him than the wheat farmer," Senator J. W. Stambaugh, Bruce, Alta., said. He recommended raising the floor price of cheese and butter.

—Central Press Canadian.
NAVY DEPUTY TO GEN. EISENHOWER—General Dwight D. Eisenhower, supreme commander of the defence forces of Western Europe, announced his appointment of Vice-Admiral Andre Georges Le Monnier as his deputy for all allied naval forces. Admiral Le Monnier is chief of staff of the French navy.

PERMANENT LICENCES

Governor Thomas E. Dewey has signed a bill permitting the motor vehicle commissioner in Albany, N.Y., to issue permanent automobile licence plates in 1953.

Made with Amazing New Fast DRY Yeast!

JELLY BUNS

Measure into small bowl, 1 c. lukewarm water, 2 tps. granulated sugar; stir until sugar is dissolved. Sprinkle with 2 envelopes Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 min., THEN stir well. Cream 3/4 c. shortening; gradually blend in 1 c. granulated sugar, 2 tps. salt, 1 tsp. grated nutmeg. Gradually beat in 2 well-beaten eggs. Stir in 1/2 tsp. lemon extract, 1/2 c. milk which has been scalded and cooled to lukewarm, and yeast mixture. Stir in 3 c. once-sifted bread flour; beat until smooth. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl and brush top with melted butter or shortening. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough and cut into 36 equal portions; knead into smooth balls. Brush with melted butter or margarine, roll in fine granulated sugar and arrange 1/2" apart on greased baking pans. Cover and let rise until doubled in bulk. Twist the handle of a knife in the top of each roll to form an indentation; fill with jelly. Cover and let rise 15 min. longer. Bake in moderately hot oven, 375°, about 18 min.

• No more disappointments because the yeast has spoiled! Fleischmann's Fast DRY Yeast replaces old-fashioned perishable yeast because it keeps fresh and full strength—right in your cupboard! For fast-rising dough and grand oven results get Fleischmann's Fast DRY Yeast to-day!

Order a month's supply!

—By Chuck Thurston

Commercial Jet Transports By 1952 Is Hope of British Air Ministry

By JOHN GOETTE
(CPC Correspondent)

LONDON.—Jet planes will be carrying commercial passengers from continent to continent at a speed of 490 miles per hour, on routes 40,000 feet above the ground, by the beginning of 1952. This is the aim of Britain's nationalized British Overseas Airways corporation as it pioneers service feasibility tests of a 48-passenger Comet.

The 93-feet long plane is powered by four kerosene-burning jet engines, whose air intakes resemble giant mouths. At the de Havilland plant at Hatfield, outside London, 18 Comets are on the assembly line. Four are for the ministry of supply and 14 for the world-girdling BOAC.

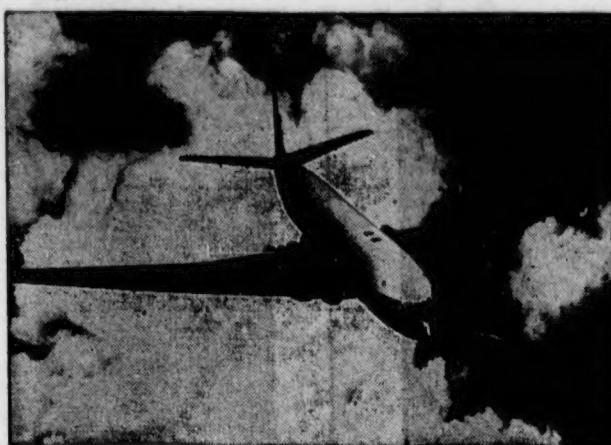

Working tests of some 525 air hours have proven ultimately successful, and all that remains is to train commercial crews and try out landing conditions and weather signals at various points. These dry-run experiments will be conducted chiefly between London and Cairo.

While the commercial jet is revolutionary in passenger air travel, it likewise scored a record, according to engineers, by being produced only three years after the basic plans were sketched.

Further aviation history will be made when pay-load flights begin within an expected two and a half years after the first Comet took to the sky.

In addition to these facts, the British point out the unusual pioneering angle of the BOAC ordering commercial jets directly from the drafting board. The airline, which flies from England to Australia with many long ocean hops en route, was attracted by the Comet's 2,140-mile practical length of flight.

The jet flies "above the weather" and gets maximum speed most economically at 40,000 feet, so that one problem to be ironed out is avoidance of low altitude circling of airfields. Fuel consumption is then both

A British prototype jet passenger plane is tested for flights of over 1,500 miles at 40,000 feet altitude.—Central Press Canadian.

great and uneconomical.

Because of the jet's terrific speed, it is essential to have weather reports for a landing when it is still 1,000 miles away.

The jet plane is designed for long flights only, since pilots must start coming down when they are as much as 250 miles from a landing point.

On the economic side for commercial aviation, the jets need no flight engineer, the instrument board is simplified, the rate of fuel-per-mile is low, and an engine can be changed by three men in one hour, thus ensuring a quick turnabout in plane service.

For passengers in the cabin, which is pressurized so that at 40,000 feet it is equivalent to only 8,000 feet alti-

tude, there is absolutely no vibration or pounding, only a soft, swishing sound.

Engineers remark the anomaly that in obliterating vibration, it was necessary to devise an artificial shaking to make instrument board needles register.

In operational tests, a Comet soared 20,000 feet over an African mountain peak, which in turn was 19,700 feet above sea level. On one African landing field the "skin" temperature of the commercial jet reached 160 degrees.

With these rigorous trials behind, BOAC crews set about to prove that jet passenger service is both a boon to travelers and an economic feasibility for an air line company.

Saskatchewan Reports Over 4,700 Driving Convictions Last Year

REGINA.—Over 4,700 convictions for violations of The Vehicles Act were recorded in Saskatchewan during 1950, according to J. A. Christie, chairman of the highway traffic board.

Analysis of these shows 17 per cent. were secured by provincial traffic officers, 8.5 per cent. by Regina police, 7.3 per cent. by Prince Albert police, 6.2 per cent. by Saskatoon police and 3.8 per cent. by Moose Jaw police. The balance were secured by police forces of smaller centres and by R.C.M.P. detachments throughout the province. Over 18 per cent. of all convictions were for speeding, over 15 per cent. were for driving without operators' or chauffeurs' licences, and 12 per cent. were for offences in connection with vehicle licences.

Traffic officers also, secured 429 convictions for violations of The Fuel Petroleum Products Act, six for liquor regulation violations, and six under The Highways and Transportation Act.

Dresses Made From Corn

CINCINNATI, O. — Now dresses can be fabricated from corn and ice cream made of buttermilk, the national farm chemurgic council disclosed recently.

The council opened its 16th annual conference and exhibited dresses and ice cream.

Chemurgists have as their objective the continued research for agricultural by-products which formerly were destroyed, a spokesman said.

MAYOR PRETTIES UP CITY

MT. OLIVE, Ill. — Mayor August Schoppman is doing his bit to make the city beautiful. For a second straight year he is issuing a dozen gladiolus bulbs to women of the community who wish to grow them.

FARTHEST NORTH

The coast-guard icebreaker Eastwind battled to within 445 nautical miles of the North Pole last summer, the farthest north in the western hemisphere ever travelled by a ship under its own power.

Health

Accidents To Children ... First Aid Advice

In a recent article in Health magazine, Dr. C. Collins-Williams pointed out that every year, in Canada, 1,500 children die as the results of accidents. And, since most accidents are not fatal, the figure does not reveal the true magnitude of the problem facing parents.

However, comments Dr. Collins-Williams, in another article—a sequel—in the current March-April issue of Health, it does show that accidents are a serious hazard which every parent must face. "Save the Children—Accidents to Children ... What to do when They Happen"—is the title of the article in the current issue of the magazine.

"It is the duty of every parent to do his utmost to prevent these accidents," writes Dr. Collins-Williams, who is Director of the Health League of Canada's Child and Maternal Health Division and a member of the staff of Toronto's Hospital for Sick Children. "However, as a second line of defence every parent should know what to do in the event of an accident so that the illness will be as short and the final outcome as happy as possible."

The writer tells what should be done if a child swallows poison, how to treat burns and scalds, advises that cuts and puncture wounds be treated with care, says that falls may be dangerous, and what to do if a child gets caught in the washing machine wringer, how to treat electrical shock, how to apply the Schaefer method of artificial respiration in cases of electrical shock and drowning, what to do about swallowed objects, and outlines procedures in cases of severe injuries.

In discussing treatment of cuts and puncture wounds, Dr. Collins-Williams says that one of the most dangerous complications of such hurts is lockjaw, or tetanus. This extremely serious and often fatal disease, resulting from introduction of lockjaw germs into the wound at the time of injury, can be prevented by immunizing the child against lockjaw in the same manner as he can be immunized against diphtheria and whooping cough.

PORTABLE CALF WEANER

A portable calf weaner, which holds six buckets inside the framework at a suitable height for feeding calves from about three weeks old until they are about three or four months old, is being marketed by Claire's Service, Wells, Somerset.

Six calves can feed at a time and the manufacturers claim that it saves labour and has better results with calves because every animal gets time to eat its share without any question of interference from the others.

The calves are held while feeding by a simple yoke which slides on the top framework of the weaner.

The tin can actually is steel, with a thin tin coat.

Wall Lights Used By Ancient Man

The oldest known form of artificial lighting fixture is a blazing branch of knotty pine, jammed into a crevice or crack in the wall of the cave home of prehistoric man. In many instances, when homes of the early-dawn cave dwellers have been discovered, smudge and soot marks on the walls have told the story of man's first attempts at bringing light into his home during the hours of darkness.

This form of lighting, the knotty pine wall fixture, was prevalent well after the discovery that oil will provide a better source of light. Many of the early English and European castles had built-in fixtures to hold the blazing torches.

The use of oil, however, changed the artificial lighting picture and brought the central, hanging light into general use. But, strangely enough, it is the principle of the ancient wall fixture that has been found the soundest, most healthy and practical source of light.

Translated into the present electrical age, the ancient pine torch has become the classical torchiere tri-light and the individual small inverted wall lamps. Both send the light upwards to the ceiling where it is broken up and reflected softly down to where it is needed.

INDIA'S POPULATION NOW 361,820,000

NEW DELHI, India.—India's population has jumped 13.4 per cent. since 1941 and now totals 361,820,000, provisional census figures indicated. It is the world's second most populous country, exceeded only by China.

An elephant in the Rome, Italy, zoo bore a 275-pound baby.

HERE'S HEALTH

Herbie's teeth had many a cavity.

The dentist regarded him with gravity.

"If you'd brushed your teeth right after eating, They wouldn't have taken such a beating."

The first West player passed in this hand from match play, and the North-South bidding was One Club—One Heart; Two Clubs—Two No Trumps; Three No Trumps. West led ♠ 2 to East's ♠ 8 and South's ♠ K. Dummy was entered with ♠ A and ♠ 4 was led. South's ♠ 10 losing to West's ♠ J. The top Spades were cashed and West shifted to ♠ 2, dummy winning. ♠ K followed, but West held off; now ♠ A was cashed, to strip West of a possible card of exit, and a third Diamond put West on play to return a Spade or a Heart.

In Room 2 West opened One Heart, North doubled and South played in Three No Trumps also. West led ♠ 5, and South failed to make this difficult contract. So his side lost 5 match points on the deal.

TRY AND STOP ME!

By BENNETT CERF

Stanton Griffis, ex-ambassador to the Argentine, says that in the part of Maine he hails from, the natives are just born traders, and grow up "Go in what comes naturally" to them. For example, he tells of one farmer who spent the long winter fashioning wooden back-scratchers, and came to Boston in the spring with a wagonful to sell. He was laughed at for his pains. "Go back to your farm, you hick," laughed one trader. "Back-scratchers have been a drug on the market for 20 years."

That very afternoon, however, an Egyptian sahib, swathed in native raiment, came to the trader and said he was commissioned by his government to purchase a thousand back-scratchers. "Everybody is clamoring for them in Cairo," he explained. "I'll have 'em for you tomorrow," promised the amazed trader. He dug up the Maine farmer, who fortunately had parked his wagon right across the street, and purchased his entire supply of back-scratchers for a very fair sum.

That evening, the farmer returned the Arab outfit he had rented from a theatrical costumer, and drove contentedly back to Maine.

"I NEED A MOBILE LADDER"

—Franc-Tireur, Paris.

On The Side : By E. V. Durling

In The Century Bracket

People who achieve unusual longevity are always asked how they account for it. The reasons given are many and varied. One I never heard before was given by the Grand Vizier of Morocco, who is one hundred and eighty years old. He said he believed he partly owed his ripe, healthy old age to the fact that he had forty wives. Max Morris of San Francisco, hale and hearty at the age of one hundred and one, smokes five long cigars a day. Most cigar smokers live to a very ripe old age. However, now and then a pipe smoker reaches the century mark. "Soda Ash" Johnny Horan of Milwaukee was a pipe smoker. He was still on the job for the Milwaukee Railroad at the age of one hundred. Johnny worked for the Milwaukee Road continuously for eighty-three years. That is the world's record for a continuous service with one organization.

Who's To Blame?

The great British prime minister, William Pitt, the younger, originated the income tax. That's what note stated by a commentator on highly serious subjects. I believe this gentleman is in error. Citizens of the Republic of Florence in the middle ages were subject to income tax. Still in a state of preservation are income tax returns made by Florentines in the fifteenth century.

In Union, Foot-Power

Another interesting feminine organization is one called the "Association of Women with Large Feet." This is a British group organized by Phyllis Crone. It seems Mrs. Crone, who wears a size nine and a half shoe, always had difficulty in getting shoes to fit her. So she decided to organize a club of women with generously proportioned pedal extremities, so they could persuade shoe manufacturers to take heed of their needs. The A.W.W.L.F. has five hundred members. To be eligible, a woman must wear size eight shoes or over. The member with the largest feet wears size eleven and a half. It seems women with small feet, that is, size two and under, should organize. They also appear to have a tough time getting properly fitting footwear.

Weight Reduction

Averil Ames, London beauty, likes to eat so much she ate herself out of a stage career. She was doing all right as a show girl until she became too plump. At 23 she weighs 193 pounds. Averil recently accepted an offer to be streamlined by a diet expert and make periodic appearances on television to show her progress. The diet expert says he will reduce her weight to 136 pounds. Before she went on a diet Miss Ames was permitted to have one last large meal. This is what she ordered: Spaghetti, roast chicken in red wine sauce, potatoes, french beans, ice cream and chocolate eclairs.

\$200,000 All At Once

Note report that Kenneth Clark, 23-year-old London bank clerk, recently won the equivalent of \$210,000 from an investment of a few shillings in a football pool. These winnings are tax-free. No wonder the British go for those football pools in such a large way. What would you do if you suddenly came into possession of \$200,000?

Happy Reunion

HAPPY REUNION AWAITED MANY OF CAYUGA CREW UPON ITS ARRIVAL HOME—Nine months of duty in Korean waters finally ended in long overdue trip home to Esquimalt, B.C., for 285 officers and men of H.M.C.S. Cayuga. Return of one of Canada's destroyers serving in U.N. fleet climaxing 54,000 miles of operations, ranging from patrols to shore bombardments. Getting re-acquainted in mess of Cayuga were C.P.O. Albert Dodd of Victoria, his wife and two children, Lyndal, four, and Sandra, nine. Dodd, a hockey fan, was more interested in discussing playoffs than experiences off the shores of Korea.—Central Press Canadian.

"I knew I should have shaved it off," was the comment of Petty Officer Norman Hopkins of Coleman, Alberta, when he greeted his family at Esquimalt, B.C., after a nine-months' absence aboard Cayuga in the Korean war zone. For daughter Gwen was frightened by her daddy's bushy beard. His wife, Joyce, didn't seem to mind too much. It was estimated that at one time there were upwards of 50 men aboard the destroyer growing beards. However, most of the whiskers were shaved off before the ship arrived at its home base in Esquimalt. Cayuga, home for a well-earned leave, during which time some of its crew and officers will be drafted ashore for promotions and participation in various courses, will be replaced in U.N. fleet by H.M.C.S. Sioux.—Central Press Canadian.

INDICTED ON INCOME TAX EVASION—Gambler Mickey Cohen, reputed kingpin of the Los Angeles underworld, and his wife, Lavonne, are shown after they surrendered in Los Angeles, Calif., on criminal complaints charging them with income tax evasion. The pair were indicted on five counts of income tax evasion climaxing two years of investigation and involving about \$156,000. The dapper gambler, acting as his own attorney, succeeded in having his bond reduced from \$10,000 to \$5,000 after he had noted that Ralph Capone, another underworld character, had been released on that bond in the east. Cohen is liable to 20 years' imprisonment and \$40,000 in fines if convicted. Mrs. Cohen, released on \$2,500 bond, could get 15 years and \$30,000 in fines.—Central Press Canadian.

New Stamps

United States issues stamp to Confederate War veterans on May 30 (top), and Israel issues three stamps soon to the 50th anniversary of the Jewish National fund, (lower).

BAD NEWS IN SMALL BUNDLE—Finance Minister Abbott has a smile on his face as he brought his brief on the budget into the House of Commons recently. His report affected the life of every Canadian adult through taxes of many types.

2930

IN GOOD GRACES OF LADY LUCK—Seen flashing a \$147,500 smile is 26-year-old Ernest Reid of Emerson, Man., who held a ticket on Nickel Coin, the 40-1 favorite that won Grand National steeplechase classic at Aintree, England. Reid, an immigration inspector, in Ottawa on official business at time of disclosure, is now one of Canada's most eligible bachelors.—Central Press Canadian.

The luck of the Irish finally came through for Vincent O'Brien of Cape Breton, N.S., seen with his family, who won \$43,000 when Royal Tan placed second in Grand National. Only two horses among a field of 36 starters completed the course. Altogether Canadians split up \$363,560 in prize money.—Central Press Canadian.

FROM "RAGS TO RICHES" IN REVERSE. For eight years the leading baritone with a Finnish Opera Company in Helsinki, Kalle Ruusunen, pictured above, is now a 45-cents-an-hour "vacuum cleaner man" in Montreal. Tall, broad-shouldered, with a powerful voice and a five-language repertoire, Ruusunen has decided to try his luck in the U.S. after receiving a "cold shoulder" from musical circles in Canada. After winning a nationwide singing contest last year he did about 20 radio shows, but when these were finished, there was nothing else. He is amazed that Canada does not offer better prospects to its artists. "In Europe if you are good," Ruusunen said, "you are on top. I have the feeling it does not matter how good you are here, if you do not have the connections."

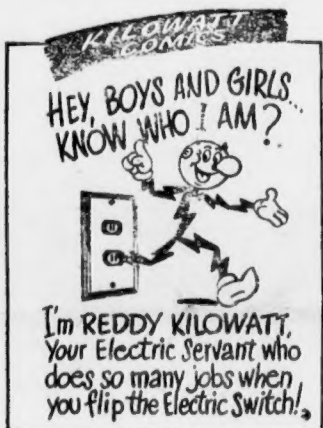

NOTICE TO CREDITORS AND CLAIMANTS

In the matter of the Estate of **LESLIE HERBERT SAUNDERS**, late of Carbon, in the Province of Alberta, Farmer, Deceased.

Notice is hereby given that all persons having claims upon the estate of the above named **LESLIE HERBERT SAUNDERS**, who died on or about the 31st day of March, A. D. 1951, are required to file with the undersigned by the 15th day of June, A. D. 1951, a full statement, duly verified, of their claims and of any security held by them, and that after that date the executors will distribute the assets of the deceased amongst the parties entitled thereto, having regard to the claims of which notice has so been filed or which have been brought to their knowledge.

DATED at Carbon, Alberta, this 20th day of April, A. D. 1951.

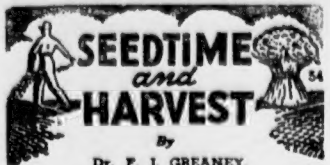

JOS. J. GREENAN,
Barrister and Solicitor,

Weed Identification Service

The first step in any effective weed control program is an accurate determination of the weed or weeds to be suppressed. Every farmer should "know the weeds he grows."

Free Service. The accurate identification of weed plants requires a good deal of training and experience. Most western farmers need some help in this undertaking. Our Weed Identification Service was organized for this purpose. Farmers have only to collect good weed specimens and take them to any elevator belonging to one of the Line Elevator Companies associated with this Department. The Grain Buyer will forward them to us for identification without cost. A report giving the correct name and remarks on control measures will be returned promptly.

How to Collect. In collecting weeds for identification be sure and secure complete plant specimens. By a complete weed specimen we mean one which possesses all the essential plant parts—roots, stems, leaves and flowers or seeds. In the case of perennial weeds, underground parts such as bulbs or "root-stocks" may be necessary for correct identification.

How to Send. First of all shake or wash all soil from the roots and then dry the plants thoroughly to prevent molding. If more than one weed is sent in for identification be sure to number and wrap each sample separately. Newspapers are excellent for wrapping. Pack the individually wrapped samples firmly in a carton or box and deliver them to your local grain buyer, or mail directly to Line Elevators Farm Service, Winnipeg.

Farmers may also, of course, have weeds identified by sending them to any one of the following: (1) Your Provincial Department of Agriculture or Agricultural Representative. (2) Your nearest Dominion Experimental Station. (3) Your Provincial University. (4) The Division of Botany, Science Service, Ottawa. The important point is to have unknown weeds identified—somewhere.

Our 80-page bulletin "An Illustrated Guide to Prairie Weeds" is available to farmers free. Consult your local grain buyer, or write to Line Elevators Farm Service, Winnipeg or Calgary, for a copy.

ward with financial support from the Canadian Cancer Society. Lend your aid by giving to the 1951 Cancer Crusade.

THERE'S MONEY FOR SEED at the B of M

For many farmers, operating funds are low at this time of year. It's the in-between period when there's lots of expense, little income. If this is your problem, talk it over with your B of M manager.

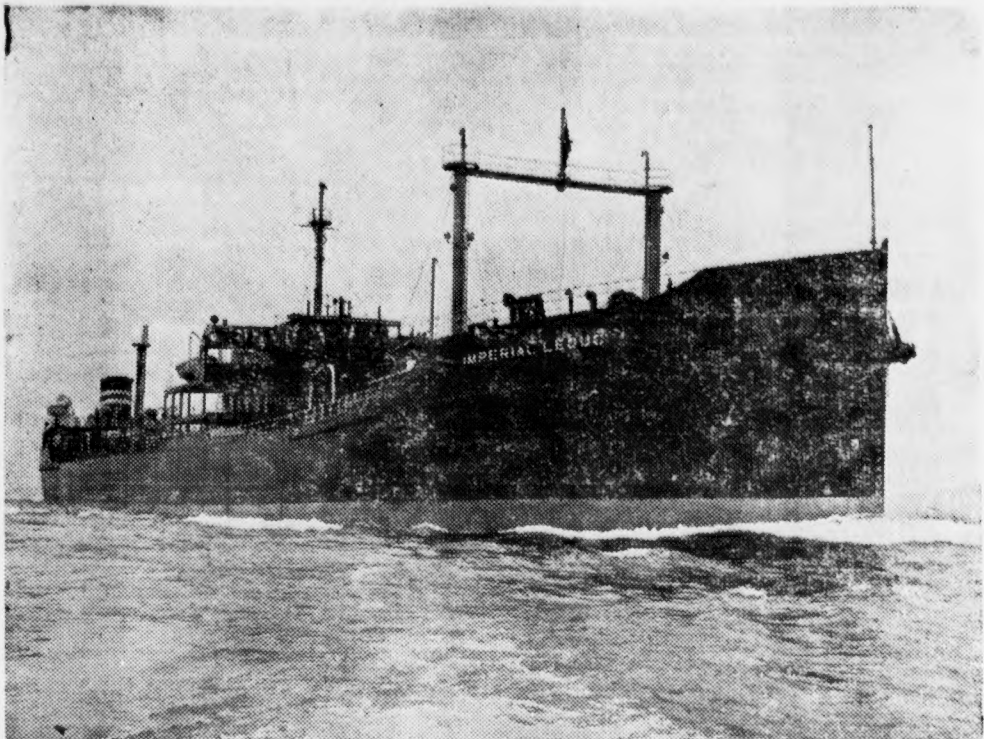

If you can plan repayment from your farm income, there's money for you at the B of M—for seed, feed or fertilizer.

BIG TANKER READY TO CARRY ALBERTA OIL

The world's largest freshwater terminal of the 1,126-mile-long A sister ship, "Imperial Red-tanker, and the first ship to carry Alberta crude oil to Ontario, the Sarnia. She will make a round trip every five days and is expected to carry about 175 million gallons of Alberta oil in a season —4 million gallons on each trip. Built at Collingwood Shipyards, she was launched last November and outfitted during the winter.

WHERE DOES THE MONEY GO ?

At times most of us have looked at purse, wallet or bank-book, and wondered: "Where does the money go?" You may have wondered, too, where does *our* money go—the money we receive for gasoline, fuel oil, lubricants and other products we sell. Well, last year each dollar we received went this way:

CRUDE OIL and the other raw materials we bought took half of each dollar.

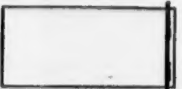

OPERATING AND ADMINISTRATIVE expenses took more than 25 cents. This was the cost of searching for and producing crude oil, and of manufacturing and marketing the hundreds of products we supplied for thousands of uses. Throughout the year high quality products were made available where and when you needed them.

TRANSPORTATION of products from our refineries to marketing points took the next big bite of the dollar. Products moved over wide areas to serve every community in Canada.

TAXES to provincial and federal governments took 7.64 cents. And this did not include gasoline tax which—depending on where you live—took from 22 to 33 cents out of every dollar you spent for standard grade gasoline.

TO REPLACE worn out equipment and to make sure that we can supply your needs in the future took 3.59 cents.

DIVIDENDS paid to shareholders for use of plants and equipment amounted to 3.45 cents.

Championship Track And Field

A few weeks ago, we outlined a program of pre-season conditioning for track and field. Now it's time to swing into more advanced training. The program described is one used by a majority of the great runners today, based on the "over and under distance principle."

Michigan University's Don Scott McEwen of Ottawa, Ontario, who is the top Intercollegiate two-miler in North America, does a lot of this sort of work.

Any training session should open with a good warm-up, including some jogging, some striding and a little sprinting, until you have worked up a sweat. Be sure to include lots of exercises, particularly those designed to loosen and lengthen the thigh and hip muscles.

In "over and under distance" training, the basic idea is to alternate the type of workout, doing under distance work one day, over distance the next. After a couple of weeks, you should change to two days of under distance, and one of over.

In the under distance work, the idea is to do repeated runs at distances less than your race. For example, you might decide to work at one-quarter of race distance. If you were a half miler, this would mean running a 220, jogging back to the starting point, doing another 220, and then repeating over and over. The 220's should be done at slightly less than your best pace. You should continue until you have covered two or three times race distance, or about 10 or 12 220's.

The next day you would do your over distance, or one three quarter of a mile run, somewhat slower than your half mile pace. To decide how far you are to go each day, alternate distances of $\frac{1}{4}$, $\frac{1}{2}$ and $\frac{3}{4}$ of your race distance, with over-distance of $1\frac{1}{2}$ times your race. This should give you an idea of how to set up your schedule of training. For example, an 880 man would do repeated 220's the first day, three quarters of a mile the second, then repeated 440's, another three quarter on the fourth day, then 660's, a three quarter, and then back to 220's again.

Emile Zatopek, the Olympic 10,000 metre champion, has been known

to do as many as 60 repeated quarters in 60 seconds or better at one time.

Always do a little more than you feel like doing. The conditioning value does not really become important until fatigue is felt. You are training not only to improve your body, style and condition, but also your competitive character.

Sprinters can also work out on the under and over distance principle but should add 10 or 15 minutes of starts every day. Athletes running middle and long distance events should finish off their over-distance workouts with 10 or 15 minutes of repeated sprints.

You can become a member of Sports College, the largest coaching service in the world, by writing a letter to "Sports College, Box 99, Toronto 1, Ontario. Membership is free. Specially-prepared books of instruction on all sports are available through the College.

Additional coaching and tips from famous athletes can be heard on the Sports College broadcast every Saturday afternoon. Look up the time and station in your area and become a regular listener.

A POPULAR CANADIAN CUSTOM from coast to coast, nothing is more friendly or relaxing than afternoon tea get-togethers. But here's a word of advice. Keep the food simple and light. Food such as cookies, light cakes or sandwiches make appetizing snacks to accompany afternoon tea—and there's no tea better than Salada.

World Happenings Briefly Told

Rear-Admiral Rowley Conway, 75, who came out of retirement to convey ships across the Atlantic in the Second World War, died recently.

Ratepayers at Carrot River, Sask., have approved a \$15,000 money by-law to be used to finance completion of the new memorial skating rink.

Britain is buying 3,000,000 pounds of strategic reserves including essential foods, mainly sugar, cereals, fats and canned meat.

A co-operative store in London was fined \$60 on conviction of an offence under the food laws. It had sold a loaf of bread which contained a piece of old newspaper.

Thirty children, many of them swinging in baskets 50 to 70 feet in the air, were rescued by firemen in Camden, N.J., from a disabled ferris wheel.

Five medical students of Adelaide University, Australia, were charged with manslaughter in the death of a freshman who was thrown in a river and drowned during a university initiation ceremony.

The Indian Government refused a visa to singer Paul Robeson to attend a Communist-sponsored peace conference in India. Earlier a visa was refused to Dr. Hewlett Johnson, Dean of Canterbury.

Gimli, Manitoba

Business Booming In Resort Town Due To R.C.A.F. Station

Business is booming in Gimli, Lake Winnipeg summer resort town, and the fact can be directly attributed to the \$1,155,000 annual payroll at the R.C.A.F. station nearby. Butcher and baker, insurance agents, hotelmen and taxi drivers are happy with the trend in business so unusual in the vacation resort's off-season. The town banker is overjoyed.

Everyone is happy—with the exception of 150 or so R.C.A.F. station officers and their families who claim that accommodation and living conditions are nothing short of "austere".

The majority of married personnel was forced to install their families in uninsulated summer cottages lacking plumbing and adequate heating facilities. Throughout the winter, it has been necessary to haul drinking water.

In addition, married officers report a gradual "creeping up" of rents. They say cottages which rented last fall at \$25 now range from \$35 to \$50 and more a month.

WC. Maurice Lipton, officer commanding the Gimli R.C.A.F. station, personally investigated living conditions of some of his officers. He wasn't pleased.

"I want to make it clear that the officers and men hold a warm personal feeling for the townspeople and

district residents," WC Lipton said. "But lack of adequate accommodation, both on and off the station, has resulted in fewer married officers being posted here than on any other station in Canada."

About 180 families are living in the Gimli-Winnipeg Beach area but another 100 couples are separated and the number is growing constantly.

Financially, establishment of the R.C.A.F. flying training school at Gimli last fall, was of extreme value to town business, the commanding officer emphasized.

In addition to the 687 officers and students on the station at present, about 115 civilians are steadily employed. Station population will grow to more than 1,100 by late summer, he believed.

WC Lipton expressed pleasure that one problem which had been considered "mighty serious"—that of finding school accommodation for children of station personnel—had been solved.

He said the federal government had provided the new Gimli school with 60 or 70 desks "on indefinite loan," thus furnishing several empty rooms. The school also receives a special non-resident fee for pupils living outside the town area.—Winnipeg Press Press.

KITCHEN MEDITATIONS

By JANE DALE

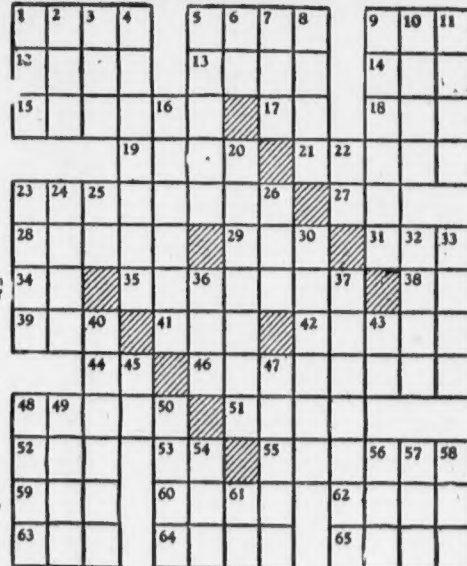

BLESSED HOUR

Blessed hour! Blessed hour!
Blessed moment of rest,
When the sun disappears
In the darkening west;
When the weary and worn
Turn to home once again,
And night with its calm
Eases sorrow and pain;
When the wee ones repose
In the circle of love,
And a prayer from each heart
Is wafted above.
This hour then is blessed,
As peace holds its sway
And hearts are at rest
At the close of the day.

Regina Soprano Wins First Honors In Radio Competition

Miss June Kowalchuk Wins Cash Scholarship Of \$1,000—Quebec City Man Male Voice Winner

TORONTO.—June Kowalchuk, 24-year-old lyric soprano from Regina, Sask., has been awarded first honors and a cash scholarship of \$1,000 in the current "C-I-L Singing Stars Of Tomorrow" radio program competitions in which 48 of Canada's foremost young singers participated.

Top male voice and winner of a \$750 cash scholarship was tenor Pierre Boutet, 25, of Quebec City. Other finalists, each of whom received a scholarship of \$500, were soprano Marguerite Gignac, 22, of Windsor, Ont., and baritone Robert Savoie, 23, of Montreal. Semi-finalists Doreen Hulme, Sault St. Marie; Mary Morrison, Winnipeg; Joseph Rouleau, Montreal, and Donald Garrard, Vancouver, each received \$100.

The scholarships were presented to the winners by Edward Johnson, former manager of the Metropolitan Opera Company, before a celebrity-studded capacity audience at Massey Hall here during the final broadcast of the current series. Dr. Johnson was introduced by Herbert H. Lank, vice-president of Canadian Industries Limited, sponsors of the popular Sunday evening program.

Adjudicators were Rhynd Jamieson, Vancouver; A. A. Aldrick, Winnipeg; Jean Dufresne, Montreal, and Dr. Healy Willan and Rex Battle, both of Toronto.

The "C-I-L Singing Stars Of Tomorrow" competition, open to Can-

adians under 26 years of age, last year attracted more than 500 young entrants who were nominated by music and voice teachers across the country. Auditioning teams, headed by Rex Battle and John Adaskin, toured the country interviewing and auditioning the entrants. A total of 48 contestants comprising 22 boys and 26 girls were selected. In turn, over the 26-week period of the series, they were brought to Toronto by C-I-L to appear on the show. Their performances were carried across Canada on the CBC's Dominion Network.

Contestants were judged by the five adjudicators on the basis of voice quality, diction, languages, interpretation and style, emotional ability, musicianship, rhythmic sense, technique, personality and future possibilities. The eight contestants receiving the highest marks were brought back to Toronto for the semi-finals last month. The four finalists were selected from this group. Final winners were determined on the basis of aggregate marks earned on their performances during the entire series.

Manitoba Installs Record Number Of Telephones In 1950

WINNIPEG.—In spite of the 1950 flood and a bad mid-summer storm, the Manitoba Telephone System in 1950 installed a record total of 12,595 new telephones.

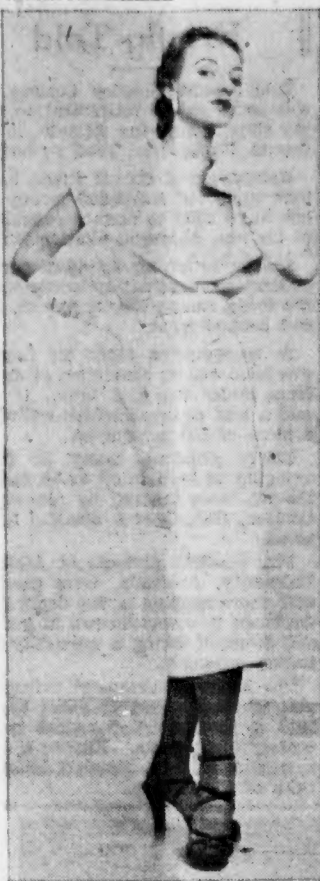

But even with these installations, the waiting list of applicants for new phones is nearly equal to the number at end of 1949. On Dec. 31, 1950, there were 16,161 unfilled applications, at Dec. 31, 1949, there were 16,453.

For six weeks during the flood, available resources of the system were employed in preserving plant and equipment. The property was saved at a cost of about \$1.5 million, but both the construction program and installation of new services was stopped.

The province ended the year with a total of 141,486 phones and in the first three months of this year the total has been increased to 144,000. The applications for service in rural Manitoba are starting to increase nearly as fast as in the urban centres. Of the 16,161 applications at end of the year, 9,013 were in Greater Winnipeg, 2,546 on provincial locals in other towns and cities, and 4,602 from rural locals.

To Live Right — Eat Right

Canadian Fashion

The sheath fashion takes on new meaning in this version by Grostern. Heavy Irish linen is used for a basic dress with deep hipline pockets. The coverup jacket boasts widespread revers.

GEMS OF THOUGHT

TODAY'S GOOD

This day is all that is good and fair. It is too dear, with its hopes and invitations, to waste a moment on the yesterdays.—Emerson.

Get the pattern of your life from God, then go about your work and be yourself.—Phillips Brooks.

Divine Love is our hope, strength, and shield. We have nothing to fear when Love is at the helm of thought, but everything to enjoy on earth and in heaven.—Mary Baker Eddy.

Do not anticipate the happiness of tomorrow, but discover it in today.—Ella Wheeler Wilcox.

Look upon every day as the whole of life, not merely as a section; and enjoy and improve the present without wishing, through haste, to rush on to another.—Richter.

Build today, then, strong and sure, With a firm and ample base; And ascending and secure Shall tomorrow find its place.—Longfellow.

Sight is a brain process dependent for its correct functioning on the normal reaction of the nervous system. The eye itself is only instrument of vision.

Helpful Hints

Even on damp days curtains will dry on a stretcher in just a few hours if you blow them with an electric fan.

Paint your radiators with oil paint if you want to get the most heat from them.

To make a drawer slide in and out easily and quietly, rub the bottom with soap.

When a speck of dirt falls on a freshly painted, wet surface, touch it lightly with a stick of wood tipped with a ball of fairly dry chewing gum, and the paint will flow together again.

Steaming velvet is the easiest way to smooth out wrinkles and lift crushed pile. Hang a velvet garment on a hanger in a steamy bathroom for an hour, and then let it dry. Be sure it hangs free so that nothing touches it until it is entirely dry. Small pieces of velvet may be steamed over the spout of a boiling tea-kettle.

DID YOU KNOW?

The outer layer of the planet Jupiter is believed to consist of clouds of frozen ammonia in an atmosphere of hydrogen and methane (marsh gas), 8,000 miles deep.

: Selected Recipes :

Party Pinwheel Sandwiches are decorative and delicious, yet they are hearty too! Each spoke in the wheel makes one tasty serving.

Sandwich Pinwheel

Make the following fillings: flaked salmon, mayonnaise egg, salad, relish cheese spread, deviled ham and cream cheese, pickle relish and butter. Use thin-sliced, fresh white bread. Make a sandwich "stack," using all five fillings and six slices of bread. Repeat until there are seven stacks. Trim off crusts. Cut each stack in two, on the diagonal. Arrange triangles on a platter to form two pinwheels. "Frost" top and one side of each triangle with cream cheese, whipped until fluffy and tinted with food coloring. Garnish each wedge with an olive, shrimp, pickled onion or sardine placed on a toothpick. Place a radish rose in the centre of each pinwheel. Makes 14 generous servings.

GARDEN NOTES

Gardeners Advised

To Try A New Variety

Of Plant Each Year

Keep Them Coming

There is no reason why the pea season should last only a couple of weeks, and that goes for beans, corn or anything else. The trick is to spread out sowings over several weeks, also to use perhaps an early, a medium and a late variety. In most parts of Canada it is possible to make regular sowings of such things as beans, beets, carrots and lettuce every two weeks up to the first week or so of July.

Be Ready For Trouble

For almost every flower, fruit, vegetable and shrub it seems there is a special insect or disease. Few indeed are free from attack and many have several enemies. The best defense is healthy growth and good seed. It is comparatively easy to control damage in a clean, well cultivated garden of husky growth, but it is a big problem where the plants are not doing well and where there are a lot of weeds and other rubbish to protect and help propagate bugs and diseases.

Fortunately for the garden enemies there are dusts and sprays specially prepared to deal with them. For the bugs that eat holes in the foliage use poison. For those that suck out the juices causing the plant to wither attack with a spray that will burn. Disease usually hits the plant cells and causes withering or rot in blackish spots. Chemicals like sulphur are used in this case. Often one good treatment will be enough but with things like leaf hoppers and potato bugs which lay eggs, two or three successive treatments to get the young ones will be needed. Most chemicals lose their potency in time so a fresh supply each season is advisable.

Give Them A Trial

It's a good plan to try something entirely new each year. By adding a flower or vegetable each season one will make new and pleasing discoveries, widen the range of interest and also value.

It should be remembered that the job of the plant breeder has been continuous. Each year he discovers new types and varieties, turning out better or harder plants that will do well in a wider range of climate in Canada.

In addition to brand new flowers

and vegetables, new shades have been added to old standbys among the flowers, and earlier, more tender varieties to standard vegetables. Some of the old favorites of our fathers and grandfathers' days would hardly be recognized today. Flowers have been greatly improved in size and color and vegetables are better too.

Even for the colder parts of Canada it is now possible to get varieties of early corn, tomatoes, melons and such semi-tender things that will do well. The plant breeders have made this possible by selecting very early maturing types and breeding from these. Certainly this point should be considered in making up the list of purchases. And it is also well to add something that, so far as the reader is concerned, is entirely new but that is recommended for his locality.

This may be broad beans or a watermelon or broccoli, table turnips, white radish, borecole, Brussels sprouts, swiss chard, chinese cabbage, hybrid corn, endive or some of the herbs. None of these things are entirely new, though certain varieties of them are, but too few of any of them are to be found in the average garden. The beginner is advised to give a few of them a trial each year. He may well find that the family really likes them and he has made a discovery that will add interest and variety to his vegetable plot.

SMILE OF THE WEEK

Clara was sitting in the movies with her girl friend when the trailer of an animal film was put on, showing a donkey going to its manger for food.

JUST BLUFFING

MEMPHIS, Tenn.—It looked like a dog fight when a large dog started barking at E. W. Jones from behind a hedge and Jones' small dog took up for his master. After keeping up with Jones and growling and snapping through the hedge, the dogs just stared at each other when they reached an opening. They jumped across the gap and continued their growling with the hedge once again safely between them.

OUR COMPLETE SHORT STORY—

HALF AND HALF

"Put Up Your Money
And I'll Cover It."
Was Jawn's Policy.

By FLOYD LYNN

EVERY person in the community awaited with interest the coming of Jawn and Sally Bascomb's next baby. Last-minute wagers were still being placed in the safe up at Bob's Cafe; and Jawn was just as confident as ever in covering all the bets offered by his neighbors.

The Bascombs already had six boys running, crawling, or being carried around their farm home. Big, booming-voiced Jawn was a man with lots of cronies, and there was a bit of kidding when Wells, the sixth boy, was born.

"What you tryin' to do, Jawn?" Bob kidded. "Raise a baseball nine?" Jawn was feeling pretty good. "You got to know how," he boasted. Jawn knew how to do a lot of things, his neighbors admitted. He had a talent for making money, knew how to raise good livestock; his wheat and flax were always a little better than his neighbors'. Another thing, he was never averse to betting, and lady luck always seemed to hover in his corner. Of course there were times when he did lose, but Jawn was a good sport. He once told Bob that if he didn't lose once in a while the boys would quit betting with him. It wasn't much of a surprise, then, when the boys edged him into the crazy bet. What set him off was when Lars slapped his big hand across Jawn's shoulder and said, "Ay bet you ten dollar you just can't get a baby girl, by Christ-mas."

When he heard the words, "bet you ten dollars," Jawn snapped into action. "Brother, you made a bet," he bellowed.

Lars hadn't, really been serious, but he put up his ten with Bob, and Jawn did too. They were pretty loud, and others drifted over.

"Come on, all of ye," Jawn shouted. "Put up your money and I'll cover it."

Bob got out a shoe box and soon had it filled. His method of book-keeping was satisfactory with all. He simply folded each man's money, with a like amount from Jawn, put the man's name on it, and dropped it into the box.

Naturally, word got around. Several wives bawled out their husbands for betting on such a subject, but by the time spring planting was done, all was quiet on the domestic fronts. The bulging shoe box was safe on Bob's shelf.

Occasionally during the summer someone would say, "Wonder how old Jawn's making out? Never see him in from the farm these days. Too busy making money, I guess." And always someone else would say, "Wonder how Sally is? Bet she doesn't even know about those bets Jawn got himself into."

But finally it was just a week before Christmas, a week before the payoff. Close neighbors had passed the word into town that sure-enough there would soon be another little Bascomb. As the evenings grew longer, talk of the bets revived.

Bob got out the shoe box, now tied with pink and blue ribbons, and put it up on display back of the counter with a pasteboard sign that said "\$720 inside. Goes to winner or winners on or before Christmas."

And that's why every living soul anxiously awaited the stork's next call at the Bascomb farm.

On December 23, "Central" Hilda Jensen in the telephone office tipped Bob that "Doc Schwartz just got called out to the Bascombs." At two in the afternoon, almost every eye in town watched Jawn Bascomb's old car pull into Main Street. They saw Jawn open the door, get out, then walk dejectedly into Bob's place.

The old Bascomb grin wasn't there, yet he didn't look sad enough for folks to get the idea that something was the matter with Sally. Still, no one had ever seen Jawn look exactly like that before. He pushed the door shut behind him and stood meeting the stares. He didn't even look toward the ribboned box.

Bob finally broke the silence. "Well, Jawn, what's the . . . well . . . the verdict? Got another kid, we hear?"

Jawn stood without answering until Lars piped up. "Yeah . . . and we're wondering . . . is it another boy? . . . or a girl, maybe?"

"Tain't the kid that's important," Jawn said at last. "It's Sally."

"Gosh," Bob faltered. "You don't mean . . ."

"Oh, the old girl got along fine. But . . . know what she's got in her fool head now?"

"No . . . what? . . . What, for gosh sakes?"

"Why, ding it, she heard about them bets. And darn if they didn't give her a silly notion. She thinks

she's got something to do with the winnin', and says I got to give her half the money!"

DR. H. KARL RASMUSSEN

Announcement is made of the appointment through the Civil Service Commission of Dr. H. Karl Rasmussen as Chief, Animal Husbandry Division, Department of Agriculture, Ottawa. Dr. Rasmussen, former associate superintendent of the Experimental Station at Lethbridge, Alberta, succeeds George Muir who retired some months ago. As Chief of the Animal Husbandry Division, Dr. Rasmussen will head up all the animal husbandry work of the Experimental Farms Service throughout Canada.

To Pay \$2,500 For Pheasant Eggs

If you think hen's eggs are expensive, try buying pheasant's eggs. The Alberta fish and game branch expects to pay more than \$2,500 for 14,000 pheasant eggs on order from the U.S. They will be hatched in incubators in the Brooks area and the young birds distributed throughout the province. They will go mostly to the eastern irrigation district, where blizzards depleted the pheasant population by about 85 per cent. The eggs will cost from 16 to 25 cents each.

Heavy Immigration Expected This Year

TORONTO.—Labor Minister Gregg said that up to 150,000 persons will come to Canada this year under the federal government's immigration program.

Speaking before the ninth annual personnel conference, he said this would be the largest annual movement of workers to Canada since the 1920's.

FIFTY-TWO DESCENDANTS

VANCOUVER.—A pioneer Vancouver resident who left 52 descendants, Mrs. Isabella Forshaw, died here at the age of 82. She came here from Fort William in 1889, three years after the city was founded, and is survived by her husband, a son and five daughters, 27 grandchildren and 19 great grandchildren.

she's got something to do with the winnin', and says I got to give her half the money!"

Lady Hermit Receives \$20,000 For Holdings

THE PAS, Man. — Eighty-year-old Kathleen Rice is northern Manitoba's Lady of the Lake—and a wealthy one.

Miss Rice, sole resident of the island bearing her name in Wekusko Lake, 100 miles northeast of here, has sold International Nickel Co. a controlling interest in her company for \$20,000.

It wasn't always that way. More than 30 years ago she discovered the value of her holdings. She staked her claim and in 1928 formed her own company. But diamond drillers seeking tests for the International Nickel were turned away from the island by a diminutive woman hermit wielding a shotgun. Years of negotiations by the company followed.

To Feel Right — Eat Right

Canada To Send 190 To Olympics

TORONTO.—Canada's Olympic association has decided to send 140 athletes to the 1952 Olympic games at Helsinki and 50 to the winter games at Oslo.

So far as Canada is concerned, it requires \$170,000 to finance the Olympic team. The association expects to obtain 50 per cent. from the federal and provincial governments, the rest from private subscription.

FIRST SEEDING OF SUGAR BEETS DURING WEEK OF APRIL 14

TABER, Alta. — First seeding of southern Alberta's 1951 sugar beet crop of 57,500 acres has been made in this district.

Clifford W. Bennett has planted a five-acre plot. First seeding last year came April 15.

Beet planting in the district is expected to become general within the next week. 2930

Cookies—extra tasty when they're **MAGIC** baked!

OAT CRUNCHIES

Measure into bowl 3½ c. rolled oats and sprinkle with 4½ tps. Magic Baking Powder, ½ tsp. salt, ¼ tsp. grated nutmeg; mix thoroughly. Combine 3 well-beaten eggs, 2 tps. grated orange rind, ¼ tsp. vanilla; gradually beat in 1½ c. fine granulated sugar and add 1½ tbs. butter or margarine, melted. Add egg mixture to dry ingredients and mix thoroughly. Drop by small spoonfuls, well apart, on greased baking sheets and centre each with a piece of nutmeat. Bake in moderate oven, 350°, about 15 mins. Remove baked cookies from pans immediately they come from the oven. Yield: 5 dozen cookies.

SO-O-O EASY TO PAINT WITH

Flite WALL PAINT

Just mix with water and apply with brush or roller. Simplicity itself! Dries odourless in 1 hour to a soft cleansable finish. You can do over an average room for two or three dollars!

Ask your paint dealer for your colour card.

LITTLE NEWS ITEMS OF LOCAL INTEREST

The creek road to the 'island' was bulldozed clear Tuesday and several feet of silt which accumulated during the flood was removed from the roadway. The north bank of the road on the 'island' side was also cut away to lessen resistance to future flood waters.

Hesketh district residents attending the Roy Ward Dixon Fun Parade program in Calgary Monday evening included Mr. and Mrs. Leo Brown, Mr. and Mrs. Jack Brown, Mr. and Mrs. Bill Church, Mrs. Jim Bacon and George Bacon.

Bob Simpson and the Sunrise Gospel Hour group will be at the Carbon Baptist Church Sunday evening, April 29, at 7:30 p.m. Everybody welcome.

The Home and School Association library fund tea and sale of home cooking will be held in the Scout Hall Saturday, April 28, from 3 to 9 p.m. A receiving centre for donations of books for the library will be set up in the hall, and all you have to spare will be gratefully appreciated.

The draw for the car blanket will be made at the tea.

Mr. Jack Hughes, principal of the Carbon school, attended a recent meeting of the A.T.A. Local at Swallow, where plans were made for the annual district track meet. The meet will be held at Acme on June 1st. Schools taking part are Swallow, Linden, Acme, Antler and Carbon. Antler school last year won the sports trophy for the third straight time.

Red Cross Donations

With the Red Cross campaign for funds officially over the Carbon branch has fallen short of its \$950 objective. To date donations have reached a total of \$787.69, with almost all returns reported by canvassers. Following is a further list of donations:

George Susan \$2, Stewart Hay \$5, Dr. G.L. McFarlane \$15, A.A. McArthur \$10, John Schmidt \$2, C.J. Hedstrom \$5, A.A. Hedstrom \$5, E.W. Hedstrom \$5, Glenn McMann \$5, J.F. Appleyard \$5, C. J. Riggs \$1, Mrs. Margaret Atkinson \$5, Richard Garrett \$20, E.D. McKellar \$20, Anna Carlson \$3, Jim Snell \$10, John Atkinson \$5, Nielsen Bros \$10, J. Redgwell \$2, R. D. Gordon \$5, Jack Brown \$5, Leo Brown \$10, I. J. Berdahl \$2, H.S. Dewar \$5.

CANCER CURE KEY: EARLY DIAGNOSIS

The key to curability of cancer lies in early diagnosis of the disease when it is localized. Responsibility for early detection rests, in great measure, on the individuals own recognition of warning symptoms and an immediate visit to his physician.

The 1951 Cancer Crusade seeks to teach every adult cancer's seven danger signals. They are:

1. Any sore that does not heal.
2. A lump or thickening in the breast or elsewhere.
3. Unusual bleeding or discharge.

charge.

4. Any change in a wart or mole
5. Persistent indigestion or difficulty in swallowing.
7. Any change in normal bowel habits.

—Is your fertilizer attachment in good repair? Fertilizer attachment parts are available in Carbon from Theo Harsch and Earl Ohlhauser. See them for your repair requirements.

Have you paid your subscription to the Carbon Chronicle? Check the label on your paper now. It bears the date to which you are paid. If your subscription is in arrears an early settlement would be appreciated.
